LOGO PRESENTATION

MEETING 13 -19 DECEMBER 2018 CZECH REPUBLIC

The theme of this LOGO is "reading" and for its realization the inspiration came from a Lotus flower. This flower, with its ability to maintain its beauty in the mud where it is born and lives, becomes the symbol of the purity of the body and soul of those who can remain pure and uncontaminated among all the difficulties of the world. Thus the LOGO represents a stylized lotus flower lying on an open book with the symbol of the United Europe in the center, four petals are illuminated by the colors of the nations involved in the project (Spain - Czech Republic – Ireland and Italy) In particular, in the central petal there is an E-Book Reader, symbol of technology and progress. The reading of a book has the same characteristic of a lotus flower as it favors concentration and undoubtedly helps us elevate the spirit, stimulate reflection, strengthen wisdom and grow not only culturally but also humanly with attitudes increasingly open and supportive towards others. Finally, the juxtaposition between paper and digital suggests that it does not matter what kind of aids are used for reading: the important thing is reading. With the aim of our project in our mind through this Logo we want to encourage people of all countries to READ, to make Humanity better.

The students of 4Asu contributed to the realization of this LOGO, in particular the students Lombardo Miriam and Paziienza Valentina, under the supervision of the Drawing and Arts teacher Valter Bellino
